

Washington Families,

West Aurora District 129 is committed to student-centered learning that fosters academic success for all students by providing an environment of equity and opportunity. We are embarking on a three year district-wide deployment plan to provide equal access to technology devices for all District 129 students. We look forward to partnering with you to achieve this goal.

Your child will be receiving a district issued Chromebook on August 23, 2018. Students are expected to bring their device home as an extension of their daily studies and to complete homework. We highly encourage families to purchase a Technology Protection Plan for \$25 to reduce any financial responsibility resulting from damage or breakage to the device. More detailed information regarding the Technology Protection Plan is available on our website <http://www.sd129.org/domain/749>.

We appreciate your support in the following expectations around the use of the Chromebook:

- Students will be expected to bring the device to school everyday charged and ready to use.
- All district issued devices are filtered for inappropriate content and non-age appropriate websites both at school and at home. **However, no content filter is perfect. There is no substitute for parental monitoring of student use of devices while students are at home.**
- Chromebooks should only be used by the student it was issued to.
- Devices should be carried in the student's school bag when traveling between school and home.
- Any damage or breakage should be reported immediately to the student's 1st hour teacher.
- Chromebooks should not be used around food or liquids.
- Students should not share their password with anyone.
- Students are expected to follow the district's Acceptable Use Policy found in the Student Handbook

There are many resources that can be found on our website <http://www.sd129.org/domain/749>, but if you require further assistance you can email us at techpilotquestions@sd129.org or contact us at (630) 301-5067. Questions can also be directed to your child's teacher or in person at Open House.

We are excited for your student to have access to technology tools, and we can't wait to see what they will achieve throughout the year!

West Aurora School District #129

Program Summary

West Aurora School District #129 is partnering with One2One Risk Solutions to provide accident protection for our technology initiative. Registering with One2One and purchasing a damage waiver will protect you from the cost to repair or replace your district-issued device and limit your responsibility to a per-occurrence deductible, should a loss occur.

Program Pricing	
Damage Waiver Cost	\$25
Limit of Liability	Replacement Cost

Effective Dates
Coverage extends from the date of purchase through the end of the school year.

Coverage
Accidental Damage
Cracked Screens
Fire
Lightning
Liquid Damage
Electrical Surge
Computer peripherals
Damages to loaner/Replacement Device
Earthquake

Exclusions
Any dishonest, fraudulent, malicious or criminal acts
Any use not in accordance with District Acceptable Use Policies
Additional loss caused by the failure to use all reasonable means to protect the device after it has been damaged
Any loss to software, data, documents, music, videos, recordings or other personal information that I have placed on the device
Lost or Stolen Devices

Annual Deductible Schedule	
Accidental Damage Claim # 1	\$0
Accidental Damage Claim # 2	\$50
Accidental Damage Claim # 3	\$75

Thank you for Enrolling!

Gallagher SCHOLASTIC
The leader in education risk management

Can my child bring their own laptop/tablet to school?

Because of the required programs and support that is necessary for students in the classroom, students must use school-issued devices for all educational activities in the classroom.

Can my child use their own device at home?

For school related activities (homework, research, online classwork, etc.), students will be required to use their district issued device. While students may be able to access many educational sites, including Schoology, on their own device, please be aware that their experience on their home device versus a district issued device may be different. District issued devices are filtered for inappropriate content and are setup for optimal functionality with district approved apps, extensions, and websites.

Can students download apps or extensions onto their devices?

Students may only download apps and extensions that have been approved by West Aurora School District 129. Students using iPads have access to the Self-Service store and may download apps. Students using Chromebooks may download approved apps and extensions through the Chrome Web Store.

Can students watch streaming media on district issued devices (Netflix/Hulu/etc)?

Students sign the district Acceptable Use Policy at the beginning of the year, which outlines the proper uses of district issued devices. Students should only be using devices for educational purposes and accessing sites that have been approved by their teacher. This may include educational videos that have been embedded into curriculum at West Aurora School District 129.

Can we use devices to play games at home?

Students sign the district Acceptable Use Policy at the beginning of the year, which outlines the proper uses of district issued devices. Students should only be using devices for educational purposes and accessing sites that have been approved by their teacher. This may include educational games that have been embedded into curriculum at West Aurora School District 129. Students on district issued devices will experience similar filtering features at both home and school.

Will the district monitor what my student is doing on the Internet while at home?

District 129 uses a content filter that limits what students are able to view on the Internet while using district owned devices. This content filter monitors student's internet usage while at school and at home. The filter is configured to block objectionable content and non-age appropriate websites, but no content filter is perfect. ***There is no substitute for parental monitoring of student use of devices while students are at home.***

Will my student have more homework with devices going home?

The workload for each class is determined by individual teachers. The devices are meant to be a tool for students to use and should not impact a change in the homework that is assigned.

Will the charging cord be provided when students take devices home?

Yes. All devices will be sent home with the proper accessories to charge the devices. Students should only use accessories provided by the district to charge their devices. Third party chargers can damage the device and should not be used. If you are interested in purchasing additional chargers for your devices, please send an email to techpilotquestions@sd129.org. It is the students' responsibility to bring their devices to school fully charged and ready to use. Damage to the cords is also covered under the district Technology Protection Plan and should be reported to their teacher immediately. Information about our Technology Protection Plan is available at <https://www.sd129.org/Page/2331>
